

Sale Name: Bank Ordered Health Manufacturer Online Auction - OHIO - 11-27-2023

LOT 43 - In-Line Fully Automated N95 respirator (foldable) machine.

Description

In-line fully automated N95 respirator (foldable) machine. The machine able to accept up to 5 layers of cloth that feeds through a sonic weld process to create the respirator while also automatically inserting the nose wire between fabric, then followed by secondary process of feeding elastic ear loops into machine and sonic welding to cloth. This process is then followed by an adhesive nose foam being applied to inside of respirator then moving into final process where respirator is folded and die cut to final product specification.

Quantity: 1
