LOT 169 - Henny Penny Shortening Shuttle® 70 lb. / 9.9 gallon waste oil transport container

Description

Henny Penny FS200.02 Details

This Henny Penny Shortening Shuttle® 70 lb. / 9.9 gallon waste oil transport container provides a safe way to dispose of used waste oil from your fryer. This shuttle is ideal for draining and transporting frying oil from open fryers to disposal units. By eliminating the need to carry hot oil in an open container, this unit reduces the likelihood of dangerous splashes and spills that can cause accidents. With a capacity of 70 lb. / 9.9 gallons, this carrier is perfect for both small and large jobs alike. This model's spout height is suitable for a dumpster-style container up to 48" in height.

Constructed out of light weight aluminum, this unit is built to withstand the wear and tear of everyday use. The flexible drain hose with quick disconnect allows for easy drainage of oil. Featuring a reinforced, end-mounted wheel assembly with large 8" wheels, this unit is easy to transport and pivot. Plus, the spout makes it possible to pivot the wheel end up, so that employees won't have to lift a loaded shuttle. When not in use, the shuttle mounts securely against the wall with the help of the stainless steel wall hook. This unit is available with male or female disconnects for your convenience.

Overall Dimensions:

Width: 12 7/8"

Depth: 11 1/2"

Height: 59"
