- 18" STEEL TRACKS

There are road restrictions in the area where this machine is located so the buyer of this asset may not be able to move it until the road restrictions are lifted. Buyer assumes all risks associated with this asset from the moment that the hammer drops and will either self-insure this asset or get insurance to cover any losses sustained with leaving it at its current location until such time that the buyer can retrieve it. The property is located on state owned property that is currently locked due to the road restrictions in the area so a side-by-side may be needed to get to this machine for inspection or there might be extended walking involved.

***No keys required for this machine.

** The owner advises us that all of the machinery was operational the last time they used it, however the equipment has been setting up for an extended period of time. Therefore he suggests that all filters should be replaced and new batteries put in the equipment before attempting to operate it. The auctioneer however reminds all

bidders that we do not warranty or guarantee any items and any statements made by the Sellers or the Debtors cannot be verified by the Auctioneer to be accurate.

Quantity: 1
